2004 KENTUCKY ANNUAL HOME HEALTH SERVICES REPORT

INTRODUCTION

The Health Policy Development Branch of the Division of Epidemiology and Health Planning announces the release of the 2004 Kentucky Annual Home Health Services Report. This branch, established in July 1996, is responsible for utilization data collection and reporting required by 902 KAR 20:008(rev. 10-15-03) and in support of the State Health Plan 902 KAR 17:041 (rev. 11-17-04). This report shows all census data, age distribution together with total patients served, and patients served by discipline and number of visits. This report is organized by county within Area Development Districts (ADD).

This report covers the services provided from January 1, 2004 to December 31, 2004. The file received from the Office of Inspector General (OIG), Division of Licensure and Regulation contained 117 Home Health Agencies. Data in this report covers 100% of all licensed home health agencies (117) that responded to the annual survey.

Data in this report are organized in three sections. Section I shows beginning census, admissions, discharges and ending census by agency and county of service. Section II shows total patients served by age category, agency and county of service. Section III shows the number of patients served and number of visits for various disciplines (skilled nursing, home health aide, physical therapy, occupational therapy, and speech therapy) for each agency during 2004. The agencies are grouped first by Area Development District then by county served. **ADD totals** appear throughout the report following all county data for each ADD. **Statewide totals** appear at the end of each section. In addition, Section IV contains information and changes regarding individual agencies during the year.

This report now becomes the most recent official data on home health services utilization published by the Cabinet for Health and Family Services. For additional copies of this report, please submit a request in writing along with a check in the amount of \$10 made payable to the Kentucky State Treasurer to:

Home Health Services Report Summary

The following tables and graphs present statistics from the Kentucky Annual Home Health Services Report from 1995 to 2004. In the reports published for 1995, 1996 and 1997, the data was reported in Medicaid Managed Care Partnership Regions (MCPR) rather than in Area Development Districts (ADDs). The survey data were recalculated using the ADDs so that a linear comparison could be made. A map of the ADDs is included at the end of this section.

The number of home health patients served in 2004 was 97,411. This number is well below the ten-year average (1995-2004) of 101,769 patients served. In 1997, the total number of patients served peaked at 114,462 but has declined since that time. Changes in federal regulations beginning in 1997 changed reimbursement for agencies and forced agencies to alter business practices. Closures, mergers, and sales of agencies were more prevalent. Overall, the number of patients served has decreased from 100,847 in 1995 to 97,411 in 2004.

According to hospital discharge data for 2004, 54,172 patients were discharged from Kentucky hospitals to home health services. This number represents 9% of the 592,066 total patients discharged from Kentucky hospitals. Of the 54,172 patients discharged to home health agencies, 32,120 (59%) were females and 22,052 (41%) were males. Conversely, the average length of stay for females was 7.65% lower than that of males.

Individually, nine of the fifteen Area Development Districts (ADDs) showed an increase in patients served from 2003 to 2004.

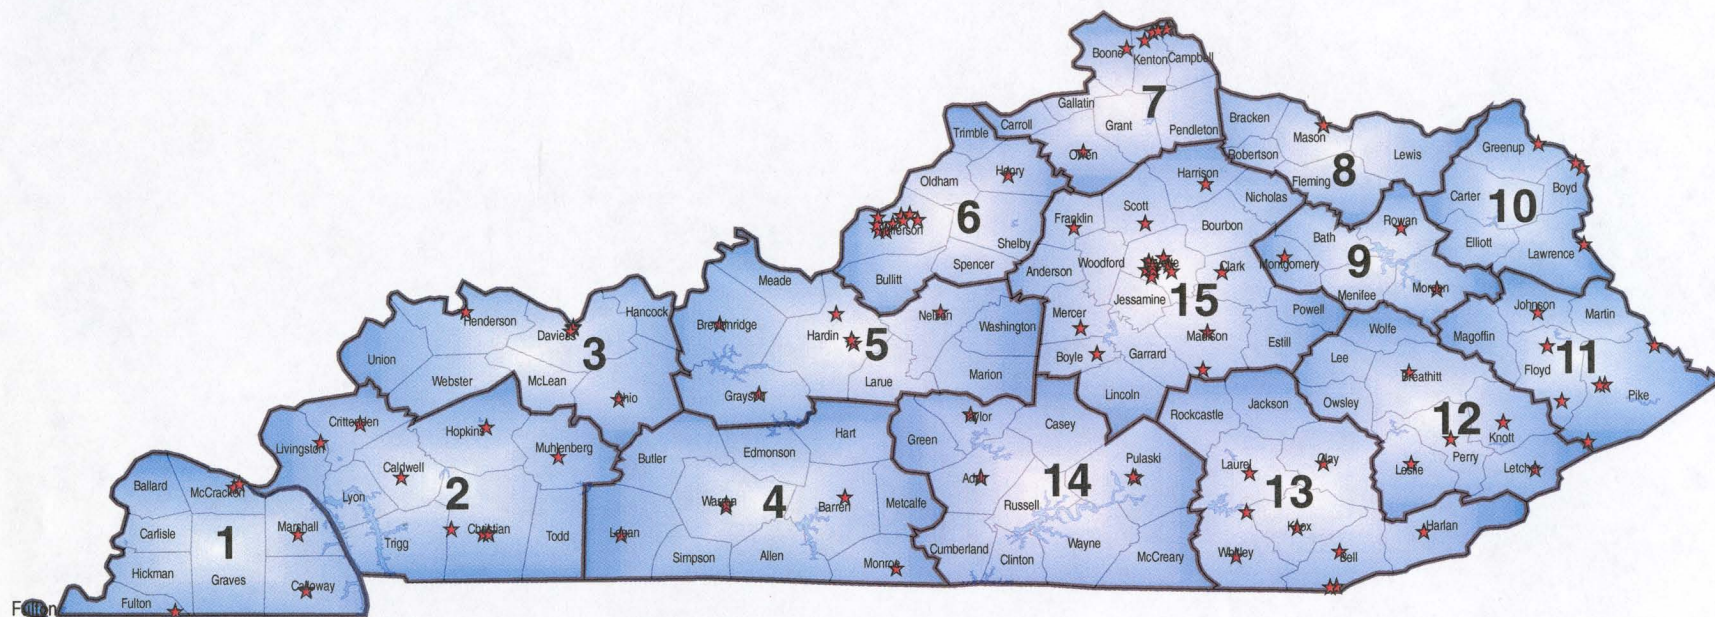

Data shows that the largest population of patients of home health services was from ages 75-84 consisting of 24% of the total patients in 2004. This trend has remained consistent from 1995 to 2004. Patients' age cohort 45-64 made up 23% of the patients served and 65-74 made up 20% of all patients served. Patients over 85 years of age made up 14% of the total number of patients served. These figures seem logical since it is expected that as people age; they will require more health services. However, there are less people in the over 85 age group in the total population and many of these may require higher levels of care than can be provided by home health agencies. Analysis of the age distribution among home health patients from 1995 to 2004 shows change over the past ten years.

Charts representing the data discussed in this summary are presented on the following pages.
